## Personal Profile

I consider myself an ambitious and hardworking individual, very curious and always eager to learn. It is the scientist in me that makes me want to find answers to unsolved questions, applying rigorous thinking and learning new abilities in the journey. I am also a firm believer that in order to grow, both professionally and personally, you need to be challenged, and this is why I consistently look for different problems that can enhance my problem-solving skills. One of these challenges was studying abroad at ETH Zürich, which turned out to be an incredible experience, and by stepping out of my comfort zone I matured in all aspects.

In my free time I like to go to concerts with my close ones, read a good book, go to the gym and do sports and travel and discover new places, cultures and people.
